

A review of how to protect our planet\ how to help environment

I want to talk about how to protect our planet. We Should Protect our Planet. There are a lot of Problems that endanger our Planet. We shouldn't cut down the trees. Trees are very important. Trees absorb carbon dioxide and give us oxygen. We need oxygen to breathe. Trees can clean the air. They are like Filters. We should Plant more trees. We shouldn't burn rubbish. We should recycle rubbish. We should use renewable energy like solar, wind and wave energy. They are good for the environment. We should save energy. We should turn off TV, computers and lights. We should save water. We should turn off the taps. We shouldn't use plastic bottles. Plastic can kill fish and sea animals. We shouldn't throw cartridge away. Ink can kill fish and sea animals.

Your dream job

I'd like to talk about a review of the job of the journalist. The job of a journalist is very important and hard. Journalists work in press, social media, magazines and newspapers. Journalists should work hard all the day. They should meet different people. They should spend a long time on the internet. They should talk to people on the phone. They should take a lot of photos. They should do research. They should be good at listening and writing. They should write articles. Some journalists give fake news to earn more money. This is bad. I love journalists. My father is a journalist. I'd like to be a journalist.

A review of a natural wonders in Egypt

I want to talk about natural wonders in Egypt. Egypt is a good country. Egypt has a lot of natural wonders. White Desert National Park is in Egypt. It is a huge desert. It has five oases with rocks. Al-Nayzak Lake, I visited it last year. It is called the shooting star. The lake looks like an eye. The water is blue and clear. It is like a Pool. You can swim and dive. You should visit it. Gebel Elba is a national Park. It has a lot of mountains. It is green and home to many animals and birds. There are a lot of natural wonders in Egypt like The Kharga Oasis and Wadi al-Weshwashy.

Life in the future

I want to talk about life in the future. I think it will be amazing and different. It will be good for the environment. We will use clean energy. We will use solar panels. We will use wind turbines. Streets will be clean. There will be a lot of trees. There will be smart flats. But they will be expensive. There will be a lot of shops and restaurants. There will be a lot of shopping malls. There will be tall buildings. There will be flying cars. There will be driverless cars. There will be robots in hospitals, shops, restaurants, schools and everywhere to help us. Robots will help us with homework and housework.

A short story I have read

I want to talk about a short story I have read. I love reading. I read stories every day. I read stories before I go to sleep. I read a story about horses last Week. It is called "black beauty". The horses are beautiful animals. The Black Beauty was a black horse. It was kind and beautiful horse. The weather was terrible. It was rainy and windy. The drivers were very poor. The horses worked all night. The horses didn't have stables. They slept out. They got wet and cold. Black Beauty was lucky. The owner was kind. It had a stable. Black beauty met her friend Ginger. Ginger was unhappy. All her owner were unkind. It is a nice story. The animals aren't machines. They feel like us.

A review about a recycling Project

I want to talk about recycling. Recycling is very important for the environment. We should recycle a lot of things. We should recycle plastic. Plastic is very bad for the environment. Plastic can kill fish and sea animals. Plastic stays in the environment for a long time. We should recycle old mobile Phones. Mobile Phones have dangerous materials which can damage the environment. We should recycle rubbish. We should put rubbish in three bins for plastic, paper and metal. We can recycle cotton and wool to make new clothes. We can make jewelry from old bottles. We can make sunglasses from fishing nets. We can make bricks from plastic bottles tops. We can recycle water. We can water plants from washing up.

A biography /your hero / role model / Famous Person (133)

I'd like to talk about my role model. My role model is Mohammed Salah. I'd like to write a biography about him. He was born in 1992 in Egypt. He got married in 2013. He has 2 daughters. He played for many teams. He also plays for the Egyptian Team. He travelled to many countries. He is good at playing football. He scored a lot of goals. He is very fast runner. He is quite short. He has curly hair. He has a big smile. He is a kind Person. He gives money to build schools and hospitals in Egypt. He gives money to Poor People. He always talks to his Fans. I Love Mohammed Salah. He is the best player in the world. I want to be a football Player Like him.

A short story about a visit to an interesting place (112)

I'd like to talk about my visit to an interesting place. I love historic places. I went to the pyramids and sphinx. I went last year. I went with my friends. We went by car. The weather was sunny. The tickets were cheap. The pyramids are very big and tall. The sphinx was huge. Our tour guide was friendly. He explained everything for us. We rode camels and horses. We saw a lot of tourists. We spoke with them in English. We took a lot of photos. We had a boat trip on the Nile River. We had lunch at a big restaurant. We were happy. We went home at 11p.m. I want to go there again.

😊 ————— بر جرافات فى امتحانات سابقة ————— 😊

A review of Climate change

I want to talk about climate change. Climate change is a big problem. Climate change causes droughts, floods, rising sea level forest fires and melting ice. We should stop climate change. We shouldn't cut down the trees. Trees are very important. Trees absorb carbon dioxide and give us oxygen. We need oxygen to breathe. Trees can clean the air. They are like filters. We should plant more trees. We shouldn't burn rubbish. We should recycle rubbish. We should use renewable energy like solar, wind and wave energy. They are good for the environment. We should save energy. We should turn off TV, computers and lights. We should save water. We should turn off the taps. We shouldn't use plastic bottles. Plastic can kill fish and sea animals. We shouldn't throw cartridge away. Ink can kill fish and sea animals. We should protect our planet.

A review on social media in our life (118)

I want to talk about social media in our life. I love social media. I always use social media. Social media is very important. Social media makes our life easy and fast. We can use social media to know all the news. We can talk to people from any country. We can talk to our friends. We can learn new languages online. We can learn new things online. We can play games online. We can watch movies and videos. We can share experiences. But social media has cons. Social media can waste our time. Children can spend a lot of time on social media. Some people cyberbully on social media. People should be careful when they use social media.

A review of satellite technology

I want to talk about a review of satellite technology. Satellite technology is very important. We can't live without satellite technology. Satellites help us to study the weather all around the world. Satellites send photos of the Earth from the space. Satellites help us watch TV. We can watch our favorite shows, sports matches, plays and movies. Satellites help us know location by using GPS. We have GPS in cars, phones and modern helmets. Satellites help us to use the internet. Satellite phones can work anywhere. They can work in desert and mountains. Dr Farouk El-Baz studied the desert and used satellite to find rivers under the sand. He helped Egypt to find water.

Space

I want to talk about the space. I love space. I want to travel to space. Space is very big. It is dark and silent. There are stars, planets and moons in the space. Some planets are hot, and some are very cold. The sun is a star. The Earth orbits around the sun every day. There isn't air in space. There isn't gravity in space. Scientists use telescopes to explore space. Astronauts go into space by space crafts. Astronauts live and work in space craft. They stay about six months. Life in space is different from life on Earth. There are astronauts walked on the moon. I want to be an astronaut.

A review of different habitats

I want to talk about different habitats. There are many different habitats around the world. There are Coastal, Grassland, Desert, Forest, Rainforest, Mountain, Wetland and Polar Habitat. The Coastal Habitat is next to the sea. The Grassland Habitat is green and no mountains. The caracals live in it. The Desert Habitat is dry. There are a lot of rocks and sand. The Forest Habitat has a lot of trees. The Rain Forest habitat is hot. There are a lot of trees and rains. The Mountain Habitat has a lot of mountains. The Wetland Habitat has a lot of water. The Polar Habitat is cold. There is a lot of ice. The Polar bears live in it.

A review of mongooses

I want to talk about mongooses. I love animals. I always read books about animals. I love mongooses. There are a lot of mongooses in Africa, Asia and Europe. Mongooses have a long body. They have short legs. They have long tails. They have thick fur. Mongooses can see and hear very well. That helps them to find food. They can kill snakes and rats. They eat small animals like birds, frogs, lizards, seeds, eggs and nuts. They live in forest habitats, wetland habitats, and grassland habitats. They live under the ground or rocks. They are active during the day. They sleep at night. Some live alone. Many live in groups. Mongoose are endangered because of deforestation.

A review about how to stop Pollution

I want to talk about Pollution. Pollution is bad for the environment. We should stop Pollution. We should protect our environment. We shouldn't cut down the trees. Trees are very important. Trees absorb carbon dioxide and give us oxygen. We need oxygen to breathe. Trees can clean the air. They are like Filters. We should Plant more trees. We shouldn't burn rubbish. We should recycle rubbish. We should use renewable energy like solar, wind and wave energy. They are good for the environment. We should save energy. We should turn off TV, computers and lights. We should save water. We should turn off the taps. We shouldn't use plastic bottles. Plastic can kill fish and sea animals. We shouldn't throw cartridge away. Ink can kill fish and sea animals.

Traditional art

I want to talk about traditional art. There are a lot of traditional arts in Egypt. Weaving is famous in Egypt. But there aren't many traditional weavers in Egypt today. Weavers use machines called looms. This machine makes fabric. Weavers can make very beautiful things. They make clothes and carpets. Last week, I visited Cairo. I saw a lot of weavers working on traditional looms. They were using an unusual material. It was plastic from old plastic bags. They found a way to make old plastic bags into long threads, which they could make into fabric. This is a fantastic idea because it is great for the environment.

A review of great green wall initiative

I want to talk about Great Green Wall Initiative. It is in Africa. It was set up in 2007 by the African union to solve the problem of desertification in Africa. Desertification is a big problem. A lot of countries face it. Desertification happens when green lands becomes desert. We must solve the problem. Sahel region has drought. Drought happened because of climate change. People can't plant the land. The Great wall initiative will Plant millions of trees, seedling and plants. It will create Jobs for 10 million People. The Great Green wall will help clean the environment and solve desertification. Trees clean the air. Trees absorb Carbon dioxide and give oxygen.

A biography of Ayman Ragab

I want to talk about a biography of Ayman Ragab. I love Ayman Ragab. Ayman Ragab is an Egyptian scientist. He loves space science. He is from a village near Luxor. He graduated from Aswan University. He worked as a teaching assistant in Aswan University. He travelled to Finland. He worked as a researcher in Finland University. He traveled to America. He did a lot of researches. NASA started a competition. He won the competition in 2019. He came the second. He suggested using jets of air to make rubbish smaller and recycle it. He found ways to save energy. He wrote many books. We should be proud of him.

A review of international space station

I want to talk about a review of international space station. The international space station is a large space craft. It is above the Earth. Astronauts live and work in space station when they go into space. They stay about six months. The international space station orbits the earth every day. We can see it in the sky without using a telescope. Life in space station is different from life on Earth. In space station washing, sleeping and eating are difficult. Communication isn't a problem. Communication is easy. Astronauts can send emails, messages and make video calls to family and friends. They use wireless headphones. I hope to travel to space.

A biography of Dr Farouk El-Baz \ a person you like

I want to talk about a biography of Dr Farouk El-Baz. I love Dr Farouk El-Baz. Dr Farouk El-Baz is an Egyptian scientist. He was born in 1938. He was born in Zagazig. He graduated from Ain Shams University. He got married. He has 4 daughters. He travelled to America. He worked in NASA. He did a lot of researches. He studied the moon. He studied the desert. He used satellite to find rivers under the sand. He helped Egypt to find water. He planned where Apollo 11 should land on the moon. He taught astronauts to study rocks. He wrote many books. He won many prizes. We should be proud of him.

A review of a job you'd like to do in the media (117)

I'd like to talk about a review of a job I'd like to do in the media. Media is very important in our life. It makes our life easy and fast. In the past, there were journalists, newsreaders and writers but today, there are bloggers and youtubers. I'd like to be a famous youtuber. I will make my channel on youtube. I will share my channel with my friends. I will buy a new camera. I will make good videos. I will have a lot of views. I will have a lot of followers. I will earn a lot of money. Social media gives a lot of jobs to a lot of people to achieve their dreams.

A biography of Safia El-Mohandes (120)

I'd like to talk about a review of Safia El-Mohandes. I love Safia El-Mohandes. She is an Egyptian woman. She was born in 1922 in Cairo. Her father was a famous linguist. He helped her to read Arabic books. Safia went to the university. She studied English literature. She graduated from the faculty of arts. She worked in Egyptian radio. She was the first female voice on the radio. She presented programmes for women and children. She presented news, drama and advice for the Egyptian family. Her famous programme was "house wives". Safia was very kind and helpful to all radio broadcaster. She helped everyone. They called her "the mother of all broadcaster". She retired in 1982.

"A biography of Farouk Shousha"

I'd like to talk about a review of Farouk Shousha. I love Farouk Shousha. He was born in Damietta. He was born in 1936. He went to a nearby school. He went to the library. He could read many books in Arabic. He went to Cairo University. He graduated from the Faculty of Dar al-Ulum. He worked on the radio. He worked as a radio presenter. He worked as a TV presenter. He liked poetry and Arabic literature. He presented many programmes. His famous programmes were "Our Beautiful Language" and "Cultural Evening." He was called "The Guardian of the Arabic language". He won the Nile Prize. He was very kind.

"A review of how learning will be like in the future"

I want to talk about a review of how learning will be like in the future. I like learning in the future. I think it will be fun and amazing. I think we won't go to school. I think it will be online. All the books and homework will be on the internet. We will use computers, tablets and mobiles. I think there will be robot teachers. I think we will use 3d printers. I think we will use virtual reality in learning. Students can visit a lot of places. They can visit ancient Egypt. They can see plants and animals like dinosaurs. We will use AI technology to learn faster.

"A review of flying cars"

I want to talk about a review of flying cars. I love flying cars. I think they will be very fast and amazing. They will change our lives. They aren't like planes. They are like helicopters. They will use electricity. They are electric. They are good for the environment. They aren't noisy. Flying cars can land on the roofs of buildings. They can land anywhere. We can fly to work. There will be space in the streets. Car companies will do lots of testing to make sure that the cars are safe. They should make new laws. They should change road signs so that the cars computers can read them. I want to buy flying cars but I think they will be very expensive.

"A review of driverless cars"

I want to talk about a review of driverless cars. I love driverless cars. They are very fast and amazing. They will change our lives. They use electricity. They are electric. They are good for the environment. They aren't noisy. We will travel anywhere without touching the controls or looking at the road. Car companies will do lots of testing to make sure that the cars are safe. They should make new laws. They should change road signs so that the cars computers can read them. I want to buy flying cars but they are very expensive. Some experts believe say they will be in 2030. Driverless cars will be part of our future.

سيرة ذاتية لأي برجراف

I want to talk about a very special person. He is a hero. He is my role model. I love him very much. We all respect him. He is very famous. He is very kind. He helped a lot of people. He made many other people's lives better. He is a great example for others. His name is أسمه. He was born in Egypt and lived there. He has a famous family. He studied a lot. He worked very hard at school. He went to the university. He graduated in Egypt. He has a good job. He did a lot of achievements in his work. He is very smart. I want to be like him.

Caracals

I want to talk about caracals. I love animals. I always read books about animals. I love caracals. There are a lot of caracals in Africa, Asia and Europe. Caracals are wild cats. They are small. They have big ears. They can hear very well. They have a lot of fur. They can jump. They can climb trees. They live in the deserts, grasslands and forests. They eat birds, rabbits and mongooses. They are active at night. They like to live alone. Mothers lives in holes. They have between three and six babies. Babies stay with their mother for about ten months. They live about 12 years old.
