2022
CATALOGUE

Production site in the middle of South Germany.

MADE IN GERMANY

We would like to present our **2022 product catalogue** to you.

We are pleased to look back on some important milestones we have achieved in the past year and set the course for 2022. A central topic here is the set-up of our production in Germany. As a German company, we are very proud to manufacture our top sellers at our company headquarters in South Germany. Since the company was founded, the majority of the added value of our entire product range has taken place at our German headquarters. In the research and development as well as the design of our products, their outstanding quality and functionality always come first.

At the same time, we attach great importance to designing and producing our products as sustainably and resource-conserving as possible. On a daily basis, we strive to deal responsibly and sustainably with our environment and our resources in all areas of the company. That is why we already use up to 50% re-granulated plastic in selected products. The topic of sustainability as well as the continuous reduction and avoidance of CO₂ emissions plays a central role for our company and our entire society.

62

CraftiX
Safety vacuum cleaners.

Our new CraftiX model series is another important milestone. With it, we are expanding our product range with the new product group of safety vacuum cleaners. The four new models offer maximum health protection against hazardous dusts. The heart of the CraftiX is the patented HEPA 13 cartridge filter with two independent filter chambers. Thanks to this technology, the suction power remains at a consistently high level during the automatic filter cleaning, which guarantees continuous extraction. Discover the innovative features of the SPRINTUS safety vacuum cleaners.

Your SPRINTUS team wishes you much fun while browsing, testing and cleaning.

SPRINTUS GLOBAL

SPRINTUS is an international, family-owned company with deep roots in South Germany.

All our top sellers are **MADE IN GERMANY**. In this way, we bear responsibility for our environment, employees and society. We strive to reduce our CO₂ emissions on a continual basis.

Innovative and customer-orientated, we are always there for you with our specialist consultants nationally and internationally.

We are represented both in Germany and at the international cleaning industry trade fairs and beyond. Here we regularly present our innovative new products.

Our digital and analogue marketing materials as well as sales documents are available in multiple languages: in German, English and French.

Our products are used in over 60 countries worldwide and offer you the right solution for every cleaning task.

More than three million products leave our production facility every year in the direction of our customers.

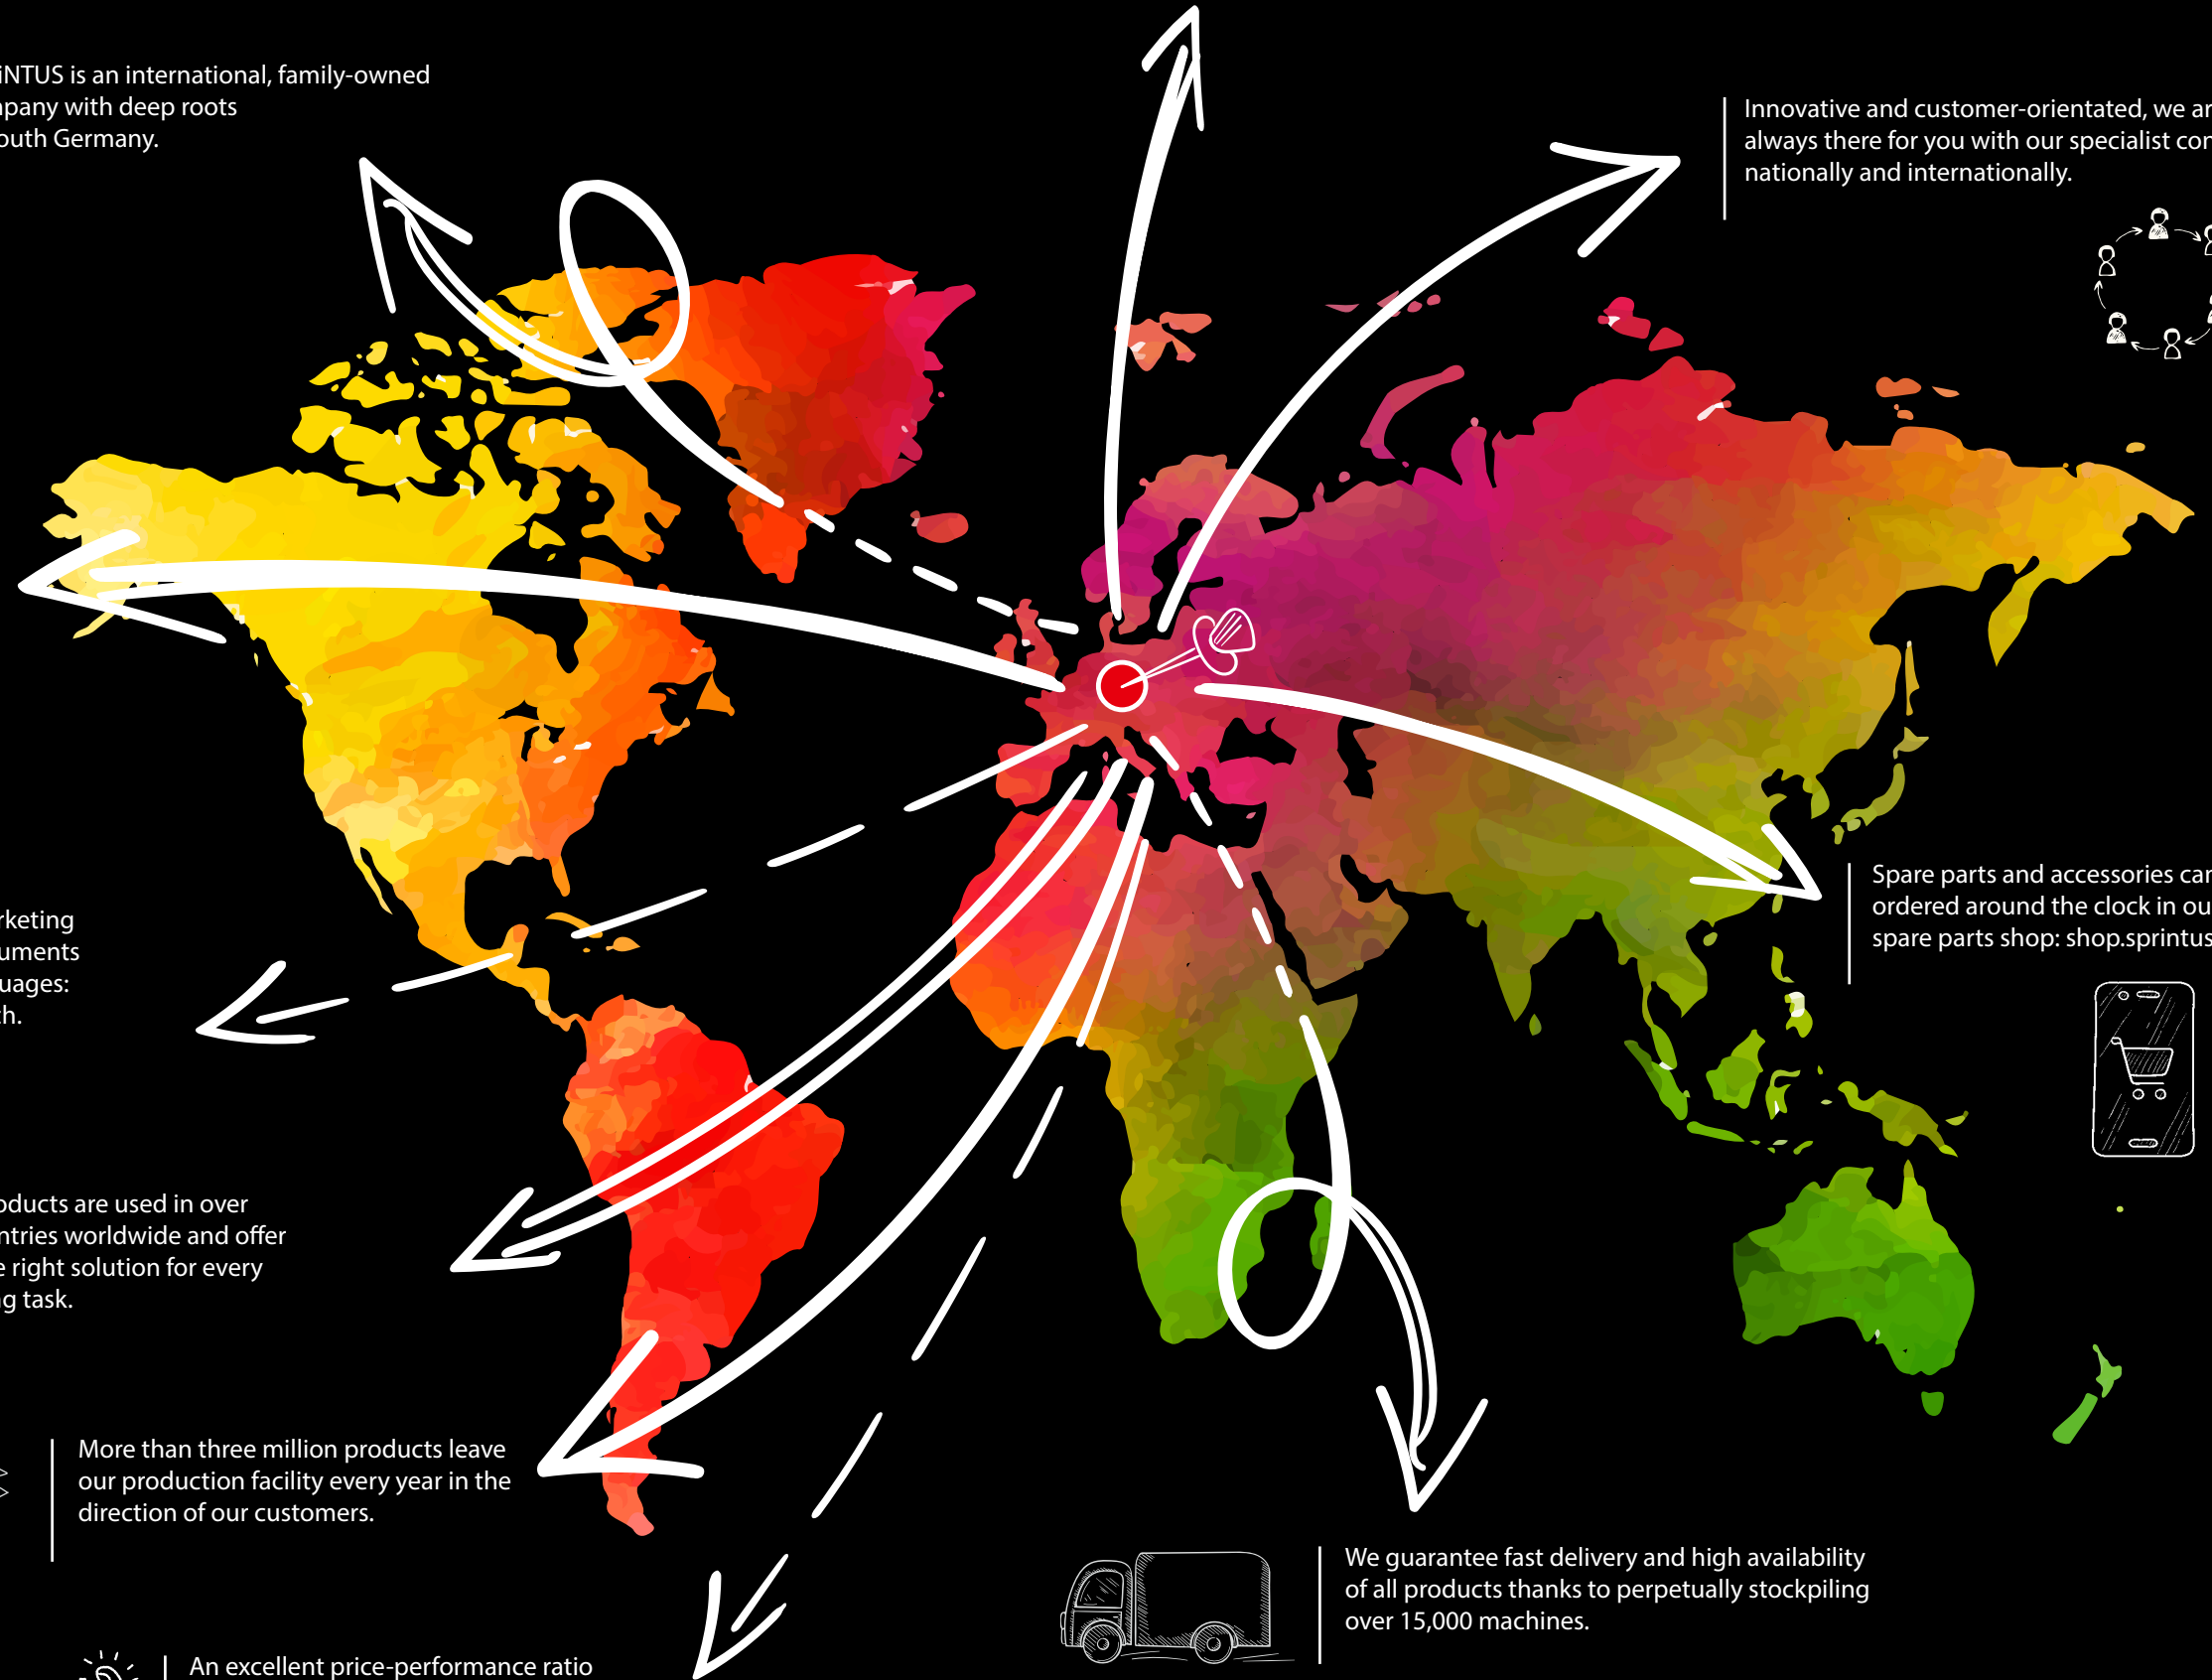

An excellent price-performance ratio and the best quality – that is our promise to you.

We guarantee fast delivery and high availability of all products thanks to perpetually stockpiling over 15,000 machines.

Spare parts and accessories can be ordered around the clock in our online spare parts shop: shop.sprintus.eu

SUSTAINABILITY

WE BEAR RESPONSIBILITY

As a highly innovative family business, we assume responsibility. Both every single one of our employees as well as we as a company. Our environment, resources and our society are very important to us. That's why we strive every day to deal with this in a sustainable and responsible manner. This means taking responsibility in economic, social and ecological terms. We assume responsibility for our products, resources, production and supply chain, employees and society. For us, above all, this means never standing still, but always being on an optimisation course.

Our Product range

Anyone who uses our professional cleaning equipment already makes a significant contribution to the issue of sustainability. Because our product portfolio serves the cleaning and thus the preservation of premises and objects. Our high-quality products are energy-saving, resource-saving and particularly quiet. They achieve a perfect cleaning result. Thanks to a multiple filtration system, including a HEPA 13 filter cartridge and filter bag in our ERA model series, they guarantee extremely clean blow-out air and protect the user and all persons in the environment.

Our Products

When developing and designing our products, their outstanding quality and functionality comes first. At the same time, we attach great importance to making them as sustainable and resource-saving as possible.

Already today, the proportion of recycled plastic in our Floory and our ERA model series is over 50%. In the future, we will consistently reduce the proportion of new plastics in our products and, while maintaining quality and functionality of our products, replace them with recycled plastic.

In addition to the compact, ergonomic and lightweight design, the durability of our extremely robust and resistant products also plays an important role in terms of sustainability. Strict test procedures ensure an extra long lifetime of the motor.

With the efficient and energy-saving 700 watt motors of the ERA TEC and ERA PRO, our customers benefit from an extremely low sound pressure level of only 49 LpA [dB]. Already during product development, we make sure that repairs are easy to carry out. For this purpose, we also offer our customers fast spare parts availability as well as a very wide range of spare parts. However, sustainability plays an important role not only in the development and production of products but also in their disposal. Therefore, our products are made of recyclable materials.

Our Resources

We pursue the goal of minimising our ecological footprint. That is why we use our finite resources as efficiently as possible and at the same time rely on renewable energies. Our photovoltaic system at our company location in South Germany produces approx. 550 MWh of electricity per year. In 20 years, the plant will save as much CO₂ as 2,671 beech trees store over the course of 55 years. Our customers and employees also have their own charging stations at their disposal, where they can charge their electric vehicles for free. Our location is also equipped with LED lighting and we attach great importance to the use of green electricity.

Through increasingly digital conferences, we are reducing business travel to a minimum and thus also the greenhouse gas emissions caused by train, car and plane. We reduce product packaging to the bare essentials, rely primarily on cardboard packaging material and avoid packaging waste from local suppliers to the furthest extent possible, for example, by using special transport boxes. As part of the delivery to our customers, we pay attention to a 100% climate-neutral parcel shipping.

Our Production

As a German company, we are very proud to manufacture our top products at our headquarters in Germany. In addition, the majority of the added value of our entire product range starts from here – from the development of our products to marketing and sales. We maintain long-standing relationships with our suppliers and reliable, honest partnerships. When selecting our suppliers, they undergo a careful examination with regard to social and ecological factors.

Our Employees

With indispensable expertise and passion, our employees are committed to our company and our customers every day. They have made SPRINTUS and its high-quality innovative products what they are today. As a company, we bear responsibility for our employees, the most important asset of our company. We guarantee secure jobs through successful products and responsible action and do everything we can to ensure the best possible working environment, regardless of if this concerns further training opportunities, the compatibility of work and family or the health of our employees. Ergonomic, modern workplaces are a matter of course for us. For a positive working atmosphere, regular team building measures and company events are important to us. As an expanding family business, we are pleased to count numerous long-standing employees.

Our Company

With the action we take on the entrepreneurial level, we bear far more responsibility than just for SPRINTUS as a company and our employees. Sustainable action has an impact across company and national borders. That is why we take responsibility for the entire society.

Our Sustainability goals

For us, assuming responsibility in ecological, social and economic terms means always being on course for optimisation. That is why we set ambitious goals for ourselves.

One of our main goals and a major challenge that we want to face is the achievement of climate neutrality. That is why we are currently working on a holistic climate strategy for our company. Based on a comprehensive analysis of our CO₂ footprint, we implement effective measures with the aim of further reducing and compensating for CO₂ emissions.

ARES

The entry-level of the professional dry vacuum cleaners.

- ① Tool-free exchange of engine filter
- ② Washable fleece filter basket
- ③ Tearproof, closable fleece filter for optimal dust intake
- ④ Comfortable suction-hose-click-system
- ⑤ Large back wheels for high stability
- ⑥ Standard 2in1 crevice-/upholstery nozzle

Optional accessories:

Parquet nozzle 360 mm horsehair.
Item no. 111.207

Tool-free exchange
of horsehair strips.
Item no. 101.104

The SPRiNTUS ARES, the compact entry-level model of the SPRiNTUS energy dry vacuum cleaners, convinces with its agility and quality, which clearly distinguish the ARES from other entry-level vacuum cleaners. A high suction power and an efficient 700 watt engine are must-haves for SPRiNTUS vacuum cleaners and allow the compact and reliable ARES to be a dynamic partner in the professional cleaning industry. Part of the extensive equipment are high quality aluminium tubes, which are in accordance with the high SPRiNTUS quality standards. The robust, 2,0 m long Memory-Flex vacuum hose and a 8 m power cord, ensure a operating radius of 10 m. Due to the standard 2in1 crevice and upholstery areas can be cleaned. Thanks to its compact size and extensive equipment, the SPRiNTUS ARES is a versatile dry vacuum, which can take on even larger cleaning challenges.

Standard parking position
of the energy combi nozzle.
Item no. 114.114

FLOORY

A top machine with an attractive price
– swift, compact and reliable.

MADE IN GERMANY

50% RECYCLED MATERIAL

The powerful and energy-saving 700 watt engine ensures an excellent suction power at a low noise level and highly efficient dirt absorption with its 11 l container volume.

As with all other SPRINTUS products, the design and development are of high quality and practical in every detail. With our FLOORY, the user receives a perfect all-round package, a reliable and economic partner for hard floors and carpet. Aluminium tube, elastic bumpers and easy emptying. The 10 m power cord and the 2 m step resistant suction hose without memory effect ensures maximum maneuverability.

Fleece filter basket as standard for bagless vacuuming.
Item no. 114.118

HEPA 13 Fleece filter bag.
Item no. 106.061

2in1 crevice-/ upholstery nozzle.
Item no. 115.127

Closable, voluminous cable hook.

Power regulation adjustable to all types of surfaces.

Large foot switch for turning on and off without bending down.

Maximum ergonomics: with a weight of only 4,2 kg, the Floory can comfortably be carried with one hand.

The new *ERA* of cleaning

Discover the new age of professional cleaning.

The ERA series sets new standards in the industry and symbolises a new ERA in professional cleaning. Unprecedented features are finding their way into the new model series, which consists of the three models, EVO, TEC and PRO, and differ primarily with regard to how they are equipped. In addition to the striking modern and open design, all models combine the integrated cable rewind and whisper-quiet operation. The top model, ERA TEC, shines with unique selling points, such as a USB connection including a mobile phone charging function and a filter compartment for spare filter bags. The ERA PRO with an integrated touch display is aligning itself with the topic of industry 4.0 for the first time and is the world's first digital dry vacuum cleaner with a Bluetooth connection and a cloud-based fleet management system.

and Energy

on the basis of a decision
by the German Bundestag

The quiet ERA EVO is versatile, compact, reliable and a true powerhouse. The integrated cable rewind makes the safe and practical storage of the signal-red 10m power cord possible. If required, you can change the cable in just a few simple steps and without using any tools. High-quality filter media, such as the standard fleece filter basket, the HEPA13 filter bag, and the HEPA13 filter cartridge guarantee clean blow-out air at all times and are particularly suitable for those who suffer from allergies or for the cleaning of sensitive areas, such as hospitals, nursing homes and kindergartens. The extra-large, tear-resistant 9-litre fleece filter bag guarantees a high volume of dirt absorption and long working intervals, without frequent and annoying filter bag changes. The power regulation that can be adjusted on the device allows for the EVO to be adapted to any floor covering. And what's best: already for small order quantities, we equip the ERA EVO with your logo and strengthen your company image and brand.

Features

Standard operating LED in blue.

Your brand. Your company image. We imprint your logo.

Integrated cable rewind with open design.

Tool-free cable changing.

Mechanical power regulation.

Tool-free removable HEPA13 filter cartridge.

All-round elastic impact edges and a continuous sliding cam ensures a smooth transition over door thresholds.

Washable fleece filter basket.

HEPA13 fleece filter bag.

Ø 120 mm

Ø 60 mm

Extra-large wheels and castors ensure a high level of agility and stability.

Tool-free interchangeable motor protection filter.

Four storage slots for accessories and three parking positions as standard.

Power cord, 10m, pluggable, signal red	111.177	111.310

The ERA TEC is consistently continuing the innovative ERA series, thereby guaranteeing top performance at an incredibly quiet 49 dB in ECO mode. The TEC can therefore be used around the clock, at any time of the day, even in busy and sensitive areas, such as hotels or in office rooms.

Should it be necessary, the spare filter bag compartment saves unnecessary legwork and loss of valuable working time should no replacement filter bags be close at hand.

The standard USB port and the optional storage box allow you to charge your mobile phone directly on the vacuum cleaner without setting aside your mobile anywhere on the property or losing sight of it. Alternatively, the storage box is also suitable as a practical beverage holder, for cleaning agents, or for carrying microfibre cloths.

The fill level indicator in red indicates that the filter bag needs to be changed or clogging.

ERA PRO

The world's first dry vacuum cleaner that rises to the challenges of Industry 4.0.

Our free ERA PRO app is available from the App Store and Play Store. For download, please scan the respective QR code.

With the first-time digitisation of commercial dry vacuum cleaners, the ERA PRO dry vacuum cleaner by SPRINTUS sets new benchmarks in professional cleaning.

The interactive touch display can be customised with your logo using the SPRINTUS APP. In this way, new customers can be acquired, and the corporate design can be adapted and underscored. A language selection (DE, ENG, FR, IT) can be made. In the event of a fault, solution suggestions are shown on the display.

In combination with the integrated Bluetooth interface, important device data such as operating hours, daily run time, location data can be transferred into the cloud-based fleet management and connected to commonly used ERP systems. Run times can be checked with the touch of a button, and property calculations can be adapted. In the display, additional

data can be stored and called up, e.g. property, user and customer data. The user can call up spare parts drawings, user manuals, data sheets and other device data at any time.

Via the interactive touch display, run times, faults, maintenance activities, as well as the date and time can be read. The home screen is individually adjustable. For example, property and user data can be continuously input and displayed.

Web portal

SPRINTUS browser-based fleet management system allows you to centrally manage all ERA PRO dry vacuum cleaners and keep an eye on everything at all times. In the general overview, all basic information concerning your ERA PRO is shown in a compact manner. You can call up data relevant for each ERA PRO, such as location, property names, users, daily run times, maintenance dates, such as the DGUV V3 for example, or faults at any time. With the synchronisation via the SPRiNTUS APP, all data is displayed in real time in the web portal.

Overview of all devices, including location, status messages and user information.

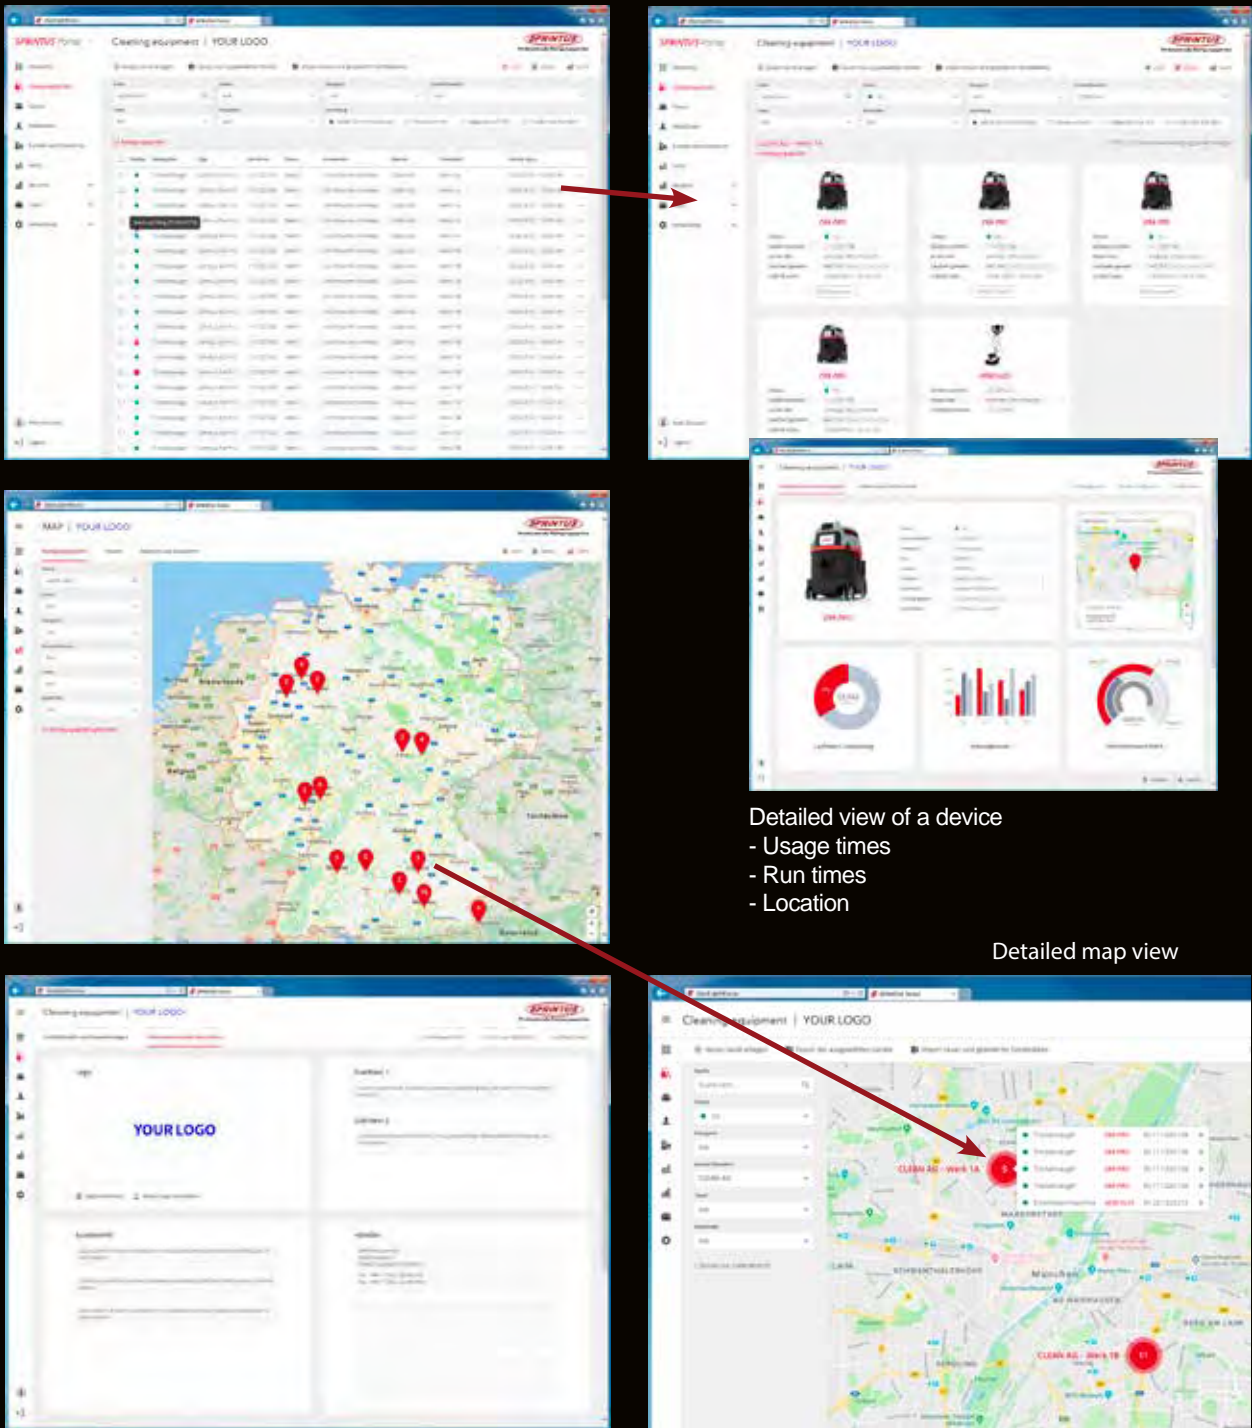

Image on the right: Cleaning equipment detailed overview.

Cleaning equipment, teams, customers, and locations can be displayed on the map.

Your own logo and texts can be changed directly on the device.

Reports
In the detail view, you have access to all relevant reports concerning your ERA PRO. This helps you to make the right decisions and keep your fleet in optimal operational condition. Other cleaning equipment located on the property can be created and be centrally managed via the web portal.

- Your advantages at a glance:**
- Overview of the status and run times of all devices
 - Faults and maintenances are displayed individually
 - Visualisation of the devices by map on a property basis
 - Extensive software functions and reports
 - Professional, customisable interface for all common ERP systems

The new generation of brush vacuum cleaners:
Unbeatable comfort! The ERA PRO in combination with the electric suction brush achieves excellent results on carpets and carpeted floors. Thanks to its permanent-magnet electric drive and high-level vacuum, it cleans deeply and gently. The carpet is literally combed out by the rotating brush and dirt is transported towards the suction nozzle and sucked in. Even tenacious dirt in the carpet, such as hair or threads, is absorbed. With the remote control on the Ergo handle, you can conveniently switch the brush on and off at the touch of a button. Thanks to the stainless-steel telescopic tube, the working height can be conveniently adjusted to any user and makes it possible to work efficiently and free of fatigue.

The figure shows an ERA PRO set including an electric vacuum brush.

Tip ERA PRO-Set including an electric vacuum brush. Item no. 117.041

MAXIMUS pt

High-performance dry vacuum cleaner with an automated power socket for electric tools.

Suggested Use

The Maximus pt is the ideal companion for any construction craftsmen. With its compact dimensions and low weight, it is perfect for electricians, carpenters or exhibition builders. Wherever a handy, lightweight device is required for fast working. Its enormous suction power guarantees a clean, dust-free workplace on location or in the shop. Any power tool can be plugged into the Maximus pt through the standardized socket & rubber adaptor. The automated socket then activates the vacuum simultaneously with the connected tool. For example when drilling, the vacuum automatically shuts down when the drill is switched off. The included 360 mm floor nozzle ensures performance on a wide range of hard floor and carpeted surfaces. The Maximus pt is universally usable for dry dust and can also be operated without the filter bag.

Features

- Enormous suction power
- Large operating radius with 7.5 m power cord and 2.5 m hose
- Rotary joint on the vacuum hose for hindrance-free maneuvering
- Built-in output regulator automatically adjusts to the type of surface
- Mess-free waste disposal with the sealable fleece filter bag
- Additional fine dust filtration possible with the EPA12 filter cartridge
- Light weight for convenient, single-handed transport
- Accessories storage on the device
- 230 Volt power socket up to 1500 watts with automatic activation
- Large, lockable cable hook

With the multi-tiered power tool adaptor, the vacuum hose can be fitted to any diameter. For example: portable circular saws.

Automated power socket for the use of power tools.

Maximum ergonomics: the vacuum and all its accessories can be transported in one hand.

Large, lockable cable hook, thanks to its swivel joint.

Parking position for accessories on the side of the device.

Four storage slots for accessories on the backside.

Accessory: Combi nozzle for textile coverings or carpets. Item no. 111.307

BOOSTIX

Backpack vacuum cleaner.

Available with power cord or wireless with a 36 V lithium ion technology.

Ideal for cleaning staircases, public transport vehicles or large halls fitted with seating, e.g. cinemas and theatres. The low weight in combination with a high level of carrying comfort makes long working intervals possible. The fully padded and ergonomic carrying system with standard chest strap may be individually adapted to each user. The well-designed carrying system ensures a pleasant clearance between your back and the backpack vacuum cleaner. The air can circulate, and heat build-up is avoided.

BOOSTIX 36V

BoostiX 36 V: Two series-connected 18 V batteries guarantee up to 42 minutes of running time. The fast charger ensures a battery charging time of just under an hour.

High efficiency and extra long motor life due to brushless EC motor.

Premium-quality and comfortable carrying system for both BoostiX models.

Perfect for narrow entrances, staircases and rooms.

Basic equipment:

MADE IN GERMANY

MEDUSA

Industrial battery-powered sweeper for the quick, quiet and cordless cleaning of all surfaces, indoor and outdoor. The full floating main cylinder brush individually adapts to any surface, whether hard surface or carpet.

Suggested Use

Ideal for entryways of all kinds, hallways, staircases, drive-ways, warehouse and office areas, airports and train stations.

The Medusa is a battery-powered machine developed specifically with professional users in mind. It has a working width of 37 cm, including its two inwards-rotating side brushes. Objects with a diameter of up to 2 cm can be easily vacuumed during operation. With its light weight and compact dimensions, the Medusa is designed for hard-to-reach spaces. The side brushes enable a complete and thorough cleaning along edges and even in the smallest corners. The powerful Lithium-Ion battery (without memory effect) with 10.8 V and 1.5 Ah allows an operation time of approx. 45 minutes per battery. A second, optional battery can be directly stored and carried on the machine itself. Quick-charging unit with a charging time of only 90 minutes is included with purchase.

Features

- Large foot pedal for activation without bending over
- Main cylinder brush and side brushes can be replaced without the use of tools
- Aluminium telescopic handle for an optimum work position
- Rubber wheels leave no traces, even on sensitive surfaces
- Enormous waste collection tray with 2 litres capacity
- Changeable bristled rim on the underside of the housing
- Low noise volume, and therefore excellent for use during business hours
- Space-saving storage position
- Compact, light, and easy-to-handle for any user
- **TIP** Can be attached to the PuriX / MatriX cleaning trolleys.

Cordless, efficient, compact and agile.

Replacement of main cylinder brush and side brushes is possible without use of tools.

Rotating cornerbrushes for perfect results in corners and edges.

Especially large waste collection tray with a volume of 2 litres.

ARTOS

High-quality, powerful wet / dry vacuum cleaner at a fair price.

Suggested Use

The vacuum cleaner is perfect for cleaning buildings, industrial facilities and workshops due to its power, compact size and robust design.

The wet / dry vacuum cleaner Artos in the 30-litre class impresses thanks to its high quality and sensational value for money. Innovative features, such as the cyclone water separation system with a reliable floater system, sets the Artos clearly apart from the other wet /dry vacuum cleaner models in the entry-level class. The wide chassis and long wheelbase make the Artos a particularly agile machine, which can be manoeuvred easily over the surface to be

cleaned. The 360 mm wide floor nozzle included in the basic configuration is extremely user-friendly and can be converted from a wet floor nozzle to a dry floor nozzle by simply exchanging the rubber strips for brush strips. High-quality components, such as the strong stainless-steel container and the 1200 Watt motor, make the Artos a robust and reliable partner in professional cleaning.

TECHNICAL DATA	
Voltage	230 V / 50 Hz
Max. power	1200 W
Sound pressure level	76 LpA [dB]
Volume flow rate	48 litres / sec.
Max. suction	230 mbar
Container material	stainless steel
Container volume	30 litres (gross)
Length of power cord	7,5 m
Length of hose	2,5 m
Diameter of hose	32 mm
Diameter of tubes	32 mm
Weight	8,9 kg
Dimensions (L x W x H)	42 x 38 x 63 cm

Always close to the action: four accessories slots and a park position for attachments on the back of the vacuum.

Easy to exchange rubber strips, no tools required. Item no. 101.101

Easy hose click system.

The illustration shows the patented water separation system with cyclone unit. Item no. 116.105

Due to the twist of the intake nozzle, the spray-fog is consequently diverted along the inner container wall. Additional filters are no longer necessary. The reliable floater system even reacts during heavy foam growth. Cooling air slots located on the side ensure the consistent separation of cooling and processed air.

Cyclone unit. Item No. 116.105

HEPA 13 fine dust filter cartridge. Item no. 116.106

The blower function is integrated on the top of the appliance and is activated simply by attaching the vacuum hose.

WATERKING

Quiet and powerful wet/dry vacuum cleaner with 30 litres container volume.

Suggested Use

The ideal vacuum for facility cleaners. Outstanding performance and thorough cleaning.

Of the 30 litres-class vacuums, the WATERKING is the best-suited for cleaning facilities. Extremely high performance (260 mbar suction power at 70 L/Sec). Used in combination with the 360 mm wide floor nozzle, the "Waterking" displays outstanding performance on a range of surfaces.

Thanks to the mechanical output regulator, suction power

can be adapted to any kind of flooring. With the integrated blower function, filters and work benches can be blown clean, or wet surfaces can be blown dry. On-device storage for the hose, power cord and accessories, as well as a parking position for the tube and an ergonomic handle, ensure optimal handling and make the "Waterking" fit for professional use. A high-performance power socket located on the head allows for the use of further cleaning machines directly through the vacuum.

TECHNICAL DATA

Voltage	220-240 V / 50 Hz
Max. power	1300 W
Power socket	Max. 1500 W
Sound pressure level	68 LpA [dB]
Volume flow rate	70 litres / Sec.
Max. suction	260 mbar
Container material	plastic
Container volume	30 litres (gross)
Length of power cord	7,5 m
Length of hose	2,5 m
Diameter of hose	32 mm
Diameter of tubes	38 mm
Weight	7,8 kg
Dimensions (L x W x H)	46 x 38 x 59 cm

The blower function is integrated into the back side of the device and is activated by simply inserting the vacuum hose.

Always close to the action:
Four accessories slots and a park position for attachments on the back of the vacuum.

Maximum ergonomics:
The vacuum can be comfortably carried with one hand, including accessories.

Features

- Outstanding water/dirt intake
- Consistent separation of intake air and processed air
- Reliable floating gauge even reacts during heavy foam growth
- Cyclone water separation system
- Robust undercarriage with 50 mm swivel casters and large wheels
- Rotary joint on the vacuum hose for hindrance-free maneuvering
- Ideally suited for dry vacuuming in combination with the fine dust filter cartridge and the fleece filter bag
- Mess-free waste disposal due to the closeable fleece filterbag

The illustration shows the patented water separation system.

Due to the twist of the intake nozzle, the spray-fog is consequently diverted along the inner container wall. Additional filters are no longer necessary. The reliable floater system even

reacts during heavy foam growth. Cooling air slots located on the side ensure the consistent separation of cooling and processed air.

WATERKING XL

Innovative wet/dry vacuum with many extras and high performance.

Suggested Use

The successful WATERKING - series has been extended with the "XL" in the 45-litres range.

Previous benefits have been retained and selectively enhanced to make the WATERKING XL the ideal companion for thorough cleaning. 260 mbar vacuum at 70 l/sec airflow combined with 450 mm wide floor nozzles ensure sufficient performance and perfect results at all times.

The innovative locking brake on the sturdy chassis prevents the vacuum cleaner from rolling away during use. The large easy-to-remove push bar permits comfortable handling and easy transport. With the standard drain hose, accumulated dirt is washed away leaving no residue.

The mechanical vacuum power control permits the optimum level for any surface. A powerful electrical outlet enables the use of additional cleaning tools directly through the vacuum cleaner. Optimal handling with accessories storage, cable rewind, locking brake and ergonomic handle make the vacuum cleaner fit for daily, professional use.

Sturdy chassis made of impact-resistant plastic with removable push bar (no tools required) and large rubber wheels.

A powerful electrical outlet enables the use of additional cleaning tools directly through the vacuum cleaner.

The locking brake can be operated from either side and prevents the vacuum cleaner from rolling away.

Dirtwater draining hose for easy emptying of the container.

Tool free changable rubber strips.

N 55/2E

Wet and dry vacuum cleaner, 2 individually adjustable turbines, 55 litres container volume.

Suggested Use

High-performance vacuum for maintenance, facilities services and the food service industry.

Especially robust stainless steel wet and dry vacuum cleaner for heavy daily use. Through the use of the fine dust filter cartridge, the fleece filter basket, and the included wet- and dry-surface accessories nozzles, an impressive area output is reached.

With two individually adjustable turbines and their large power reserves, the vacuum is capable of the appropriate

suction power for every situation. The convenient container tilting function enables fast and handy emptying. The sturdy chassis with metal casters and large rubber-coated wheels ensures problem-free working, even on sensitive surfaces.

Also available is an optional 650 mm gangway nozzle for wet surfaces, which can be mounted on the undercarriage of the N 55/2 E and operated from the backside of the device.

TECHNICAL DATA

Voltage	220-240 V / 50 Hz
Max. power	2400 W
Number of turbines	2
Max. suction	210 mbar
Volume flow rate	2 x 54 litres / Sec.

N77/3E

Stainless steel wet and dry vacuum cleaner, 3 adjustable turbines, 77 litres container volume.

Suggested Use
High-performance vacuum for maintenance, facilities services and the food service industry.

The professional vacuum with a fine dust filter cartridge, fleece filter basket, and complete accessories. Extremely high performance and easily adaptable due to its three individually-adjustable turbines. The N 77/3 E is an especially robust stainless steel wet and dry-surface vacuum cleaner and was conceptualized for excessive use. The convenient container tilting function enables fast and handy emptying. The sturdy undercarriage with metal casters and large rubber-coated wheels ensures problem-free work, even on sensitive surfaces. Also available is an optional 650 mm gangway nozzle for wet surfaces, which can be mounted on the undercarriage of the N 77/3 E and operated from the backside of the device.

Standard kit: tilting function allows an ergonomic emptying.

Three individually adjustable turbines for simple adaptation of the suction power.

Accessories:
3 m oil-resistant antistatic suction hose. The hose is electrically conductive and ensures optimum discharge of any electric charge via the grounded body.
Item no. 102.116

In addition with a fine dust cartridge and a fleece filter bag a extra high filtration rate is guaranteed.

Accessories: Extremely robust metal floor nozzle 450 mm. Item no. 102.051

Easy, tool-free change of rubber lips.
Item no. 102.126

- Features**
- 3 individually adjustable turbines
 - 15 m power cord for efficient work
 - Robust undercarriage, stable swivel casters, rubber-coated wheels
 - Solid stainless steel container with container tilting function

N80/2K

Grand class at a low price. Very durable all-purpose vacuum with container volume of 80 litres.

Suggested Use
High-performance vacuum for maintenance, facilities services and the food service industry.

Wet/dry vacuum cleaner with outstanding price to performance ratio. The N 80/2 K is equipped with a fine dust filter cartridge, fleece filter basket and complete accessories. Its integrated waste water drainage hose makes it especially suitable for frequent use on wet and large surfaces. Two separately operable turbines create power reserves and make the vacuum adaptable to each individual implementation. With its particularly durable plastic container, robust carriage with metal casters, and large, rubber-coated wheels, the N 80/2 K is optimally equipped for daily, hard use. Its extensive accessories can be stored ergonomically on the back of the device.

- Features**
- Accessories are always at hand on the rear side of device
 - Large area performance due to 450 mm floor nozzle
 - Waste water drain hose for ergonomic container-emptying
 - Rotary joint on the vacuum hose for hindrance-free maneuvering
 - 2 individually switchable turbines
 - Efficient working due to 15 m electric cable and 3 m suction hose
 - Robust chassis, stable castors and rubberized back wheels
 - Durable plastic container with carrying- and push-handle

Backsides of the device accessories are easily accessible, while stored safely.

KETOS 56/2E

This 55-litres stainless steel dry/wet vacuum from our KETOS product line is bursting with strength. The in series connected high performance motors attain a suction power of 300 mbar at a volume flow of 70 litres/sec. per motor.

Suggested Use

Ideal for contractors, industry, maintenance service and food service.

The KETOS is an extremely high-performance, modern, professional vacuum cleaner of top class. Its in series connected motors create a kind of turbo charging effect, which triggers the machine's intense power spectrum. Despite a 50 % higher voltage use, the KETOS fulfills the ever-growing requirements of environmental consciousness and reduces noise volume to only 76 db (A) while operating at full capacity. With the KETOS, you work sustainably and efficiently at the cutting-edge of technology and can choose between the Economy and Turbo settings according to the demand. The reliable, patent-pending Cyclone Water Separation System assures optimal water intake. Furthermore, the KETOS is equipped with a blower function on the back side of the machine, which is activated simply by inserting the vacuum hose, with a large lockable cable hook, an additional blower hose, and an easily removable filter cartridge which upgrades the machine's fine dust collection class to EPA12.

The KETOS can be emptied comfortably by tipping the body or through the strengthened, curved hose.

The KETOS can either be tilted or conveniently emptied by the increased kink hose.

The KETOS N 56/2 E is equipped with an easily removable filter cartridge on the exhaust side, upgradable to EPA12. Item no. 112.101

Clever solution: Large, lockable cable hook, thanks to its swivel joint.

Switch on the face of the machine lets you choose between Economy and Turbo settings.

Accessories: Item no. 102.116
3 m antistatic and oil resistant suction hose. The hose is electrically conductive and ensures optimum discharge of any electric charge via the grounded body.

TECHNICAL DATA

Voltage	220-240 V / 50 Hz
Max. power	2600 W
Number of turbines	2
Sound pressure level	74 LpA [dB]
Max. suction	300 mbar
Volume flow rate	2 x 70 litres / sec.
Container material	stainless steel
Container volume	55 litres (gross)
Length of power cord	10 m
Length of hose	3 m
Diameter of hose	38 mm
Diameter of tubes	38 mm
Weight	21 kg
Dimensions (L x W x H)	47 x 54 x 90 cm

Power-house with 300 mbar

Picture shows optional metal floor nozzle Item no. 102.051

Features

- Extremely high-performance
- Economy and Turbo power settings
- Low noise generation, only 76 LpA [dB]
- Robust chassis, stable metal swivel casters, rubber-coated wheels
- Systematically-separated cool and processed air
- Complete accessories stored at the backside of device
- Emptying possible through hose or by tipping
- Container, push bar and vacuum tube made of stainless steel
- Cyclone Water Separation System
- Unique, lockable cable hook
- Performance regulation
- Blower function

Due to the twist of the intake nozzle, the spray-fog is consequently diverted along the inner container wall. Additional filters are no longer necessary. The reliable floater system even reacts during heavy foam growth. Cooling air slots located on the side ensure the consistent separation of cooling and processed air.

The illustration shows the patented water separation system with cyclone unit.

KETOS 81/2K

The Dry/Wet-vacuum KETOS satisfies through the newest technology, enormous performance ability, and a large container volume of 80 litres.

Suggested Use

Ideal for contractors, facilities and maintenance services and the food service industry.

The KETOS, with its wear-resistant plastic container, is an extremely high-performance, modern and commercial professional vacuum, developed for heavy daily use. With 300 mbar pressure and a 70 litres/sec. volume flow per vacuum motor, the KETOS provides enough power for every situation. Along with the stable container, the KETOS is equipped with a robust undercarriage, metal swivel casters and large rubber-coated wheels.

The reliable, patent-pending Cyclone Water Separation System has been integrated into the new product line and assures optimal water intake. Through the swirling motion at the intake, spray water is segregated upon contact with the container wall.

Additional filter materials are no longer needed. Further more, the KETOS is equipped with a blower function on the back side of the machine, which is activated simply by inserting the vacuum hose. Other new features include the large lockable cable hook, an additional blower hose, and an easily removable filter cartridge which upgrades the machine's fine dust collection class to EPA12.

N51/1 KPS

High-performance pump vacuum with an extremely high flow volume.

Application example:
Flat roof sanitation

Suggested Use

Pumping out water after floods or water main breaks, washing flat roofs, pond or pool sanitation, and other cleaning duties.

The N 51/1 KPS, with its 50 litre container volume, is ideal for tough, professional use. The integrated pump with a flow volume of up to 14,000 litres per hour can be directly attached to the vacuum's power socket. A filter net prevents leaves, wood, and smaller objects from entering the container and prevents blockages. The filter net can be conveniently emptied via the robust zipper. Wastewater is continually drained from the container through the provided 10 m wastewater hose. The C-tube connection of the wastewater hose is a standardized size that also fits fire department and technical emergency service (THW) hoses.

The N 51/1 KPS can also be used as a normal vacuum cleaner and achieves a suction power of 230 mbar.

Features

- Exceptionally robust container made of impact-proof plastic
- High-performance pump with a flow volume of up to 14,000 Litres per hour
- Separate filter net for rough particles
- 10 m wastewater hose with C-tube connection
- Also suitable for normal vacuum use

The powerful pump inside the vacuum cleaner has a capacity of up to 14,000 litres of waste water output per hour.

The 360 mm wide wet floor nozzle, pictured being used on a flat roof.

C-tube connection for 10 m wastewater hose, suitable for fire service hose.

The filter net protects the pump from leaves and other coarse particles.

High safety due to the standard circuit breaker.

TECHNICAL DATA

Voltage	230 V / 50 Hz
Total power	2200 W
Power consumption (device)	1300 W
Power consumption (pump)	900 W
Max. Suction	230 mbar
Volume flow rate	70 litres / sec.
Pump capacity	14.000 litres / h
Pumping head	9 m
Container material	plastic
Container volume	50 litres (gross)
Wastewater connection	c-tube
Length of vacuum hose	7 m
Length of discharge hose	10 m
Diameter of hose	38 mm
Diameter of tubes	38 mm
Particle size	20 mm
Length of power cord	7,5 m
Weight	15 kg
Dimensions (L x W x H)	50 x 44 x 65 cm

Item no.	UK	EU
N 51/1 KPS	110.500	110.003
4 x 0,5 m suction tube plastic ø 38 mm, 7 m suction hose, 10 m discharge hose, integrated wastewater pump, filter net with zipper, pond nozzle, crevice nozzle, wet floor nozzle 360 mm, Power cord incl. GFCI interrupter		
STANDARD KIT:		
Suction tube plastic (1 piece)		110.047
Filter net		110.048
7 m suction hose		110.049
10 m suction hose extension		110.053
Power cord incl. GFCI interrupter	110.091	110.072
ACCESSORIES OVERVIEW, see page 94.		

Operating principle:

Water is pumped in through the vacuum hose. The integrated water pump draws the collected wastewater immediately through the C-tube connection and out through the backside of the device.

The transparent pond nozzle is also well-suited for pool cleaning and for removing water after floods.

Heros

Fire service vacuum

Powerful, compact and equipped with the latest technology.

Suggested Use

Pumping out of water after floods, fire damage restoration, tube damage, flat roof refurbishment, pond or pool cleaning and other cleaning tasks.

This modern professional vacuum pump is specifically designed for fire brigades and federal agencies for technical relief (THW), and long-term use with all types of floods and high water. Contaminated wastewater, sludge, stones, wood and other non-flamm-able solids and suspended matter can be efficiently sucked away. Featuring a range of close to 20 metres, emphasis is on the highest degree of safety and performance.

The Heros comes with IP 68 connectors with bayonet retaining rings and protective covers, safety switches and an IP 54 socket as standard.

The impact-resistant and compact plastic tank allows optimum mobility with a low overall weight of only 19 kg.

Further standard fittings such as the separate connectible pump, solid rubberised wheels with practical locking brakes, and fire brigade-approved Storz coupling provides you with a reliable partner at your side.

TECHNICAL DATA

Voltage	230 V / 50 Hz
Total power	2200 W
Power consumption (device)	1300 W
Power consumption (pump)	900 W
Suction capacity	150 l/min
Max. Suction	230 mbar
Volume flow rate	70 Liter / Sek.
Pump capacity	14.000 Liter/h

NEW

CraftiX

Maximum health protection in the case of hazardous dusts.

The new certified safety vacuum cleaners by SPRiNTUS for dust classes L and M vacuum where hazardous dust is produced. Directly on the power tool. And all this with automatic filter cleaning with a consistently high level of suction power.

Good reasons for efficient dust control.

Where power tools are used, dust is often produced. Not any type of dust, but harmful fine particles. The dust should be absorbed where it is formed, directly on the power tool.

This is exactly what the robust SPRiNTUS safety vacuum cleaners are designed for. Whether on the construction site or in the workshop, they collect dusts that are hazardous to health at a constantly high level of suction power before it pollutes breathable air. In particular, fine dusts remain in the air we breathe in for a long time and can penetrate deep into the lung tissue. This can lead to asthma and other chronic lung diseases. For this reason, legislators also prescribe the use of certified safety vacuum cleaners at construction sites. With the CraftiX safety vacuum cleaners, you protect the user from these risks. In this way, sawing, drilling, cutting, milling and grinding work can be carried out efficiently and safely without hesitation.

Your application is crucial.

What kind of safety vacuum cleaner is suitable for your application? The dust classes provide the answer to this question. Materials and their dusts are classified according to them and machines are certified, because the vacuum cleaners meet the corresponding requirements for dust control.

Dust class*	Maximum transmittance	Suitable for	Material
L 	≤ 1,0%	• Dusts with OEL** values > 1mg/m³	• Lime dusts • Plaster
M 	< 0,1%	• Dusts with OEL** values ≥ 0,1mg/m³ • Wood dusts up to 1200 W/50 l	• Wood dusts (beech, oak) • Paint dust particles • Ceramic dusts • Dusts from plastic
H 	< 0,005%	• Dusts with OEL** values < 0,1mg/m³ • Carcinogenic dusts (Section 35 G StoffV) (German Ordinance for Hazardous Substances) • Pathogenic dusts	• Carcinogenic dusts (lead, coal, cobalt, nickel, tar, copper, cadmium, etc.) • Mould, bacteria • Germs • Formaldehyde

*according to the standard: IEC / EN 60335-2-69

**occupational exposure limit value

The table provides information about the maximum transmittance of a certified vacuum cleaner as well as the legal occupational exposure limit value of the dusts. Class-L dusts are classified as only slightly hazardous, those belonging to Class M are deemed hazardous and those belonging to Class H are regarded as extremely hazardous. No special regulations must be observed when disposing L-dusts. M-dusts, on the other hand, must be disposed of in a low-dust manner and H-dusts must be disposed of in a dust-free manner. Depending on the dust class, the use of fleece filter bags (item no. 102.031) or special PE disposal bags (item no. 118.138) for dust-free disposal is recommended.

The SPRiNTUS safety vacuum cleaners at a glance.

For an efficient control of Class L and M dusts, we offer you the CraftiX model series with a total of four safety vacuum cleaners. In both dust classes, you have the choice between a model with a container volume of 35 and 50 litres.

With the CraftiX models you ensure maximum health protection of the user. The efficient filter cleaning ensures a permanently free filter with a perpetually high level of suction power. This saves you time and money because filter cleaning takes place automatically without suction current and power interruption, even in the case of extreme amounts of fine dust.

CRAFTIX 35 L

CRAFTIX 50 L

CRAFTIX 35 M

CRAFTIX 50 M

For Class-L dusts with automatic filter cleaning.

The CraftiX 35 L and 50 L safety vacuum cleaners are your ideal partner if you work with Class-L dusts that are slightly hazardous to health. Thanks to the anti-static preparation, an optional anti-static hose (item no. 118.143) can be connected to prevent electrostatic charges. In this way, dangerous sparks, static charging and the deposition of dirt in the suction hose can be avoided.

For hazardous Class-M dusts with automatic filter cleaning and extended warning system.

Wood dusts, paint dusts or other dusts – the two safety vacuum cleaners CraftiX 35 M and 50 M absorb hazardous Class-M dusts before they enter breathable air. Due to the standard anti-static equipment, the two M safety vacuum cleaners are ideal for extracting large amounts of fine dust directly on the power tool.

Patented filter cleaning.

Dealing with hazardous dusts requires innovative product developments. The heart of the CraftiX is the patented HEPA 13 cartridge filter. It consists of two independent filter chambers, which are cleaned one after the other. Suction current and suction power thus remain at a consistently high level even during cleaning, which guarantees permanent suction.

Filter cleaning is carried out by air backwashing and, thanks to the patented cartridge filter, ensures that the fine pores of the filter are freed from dust without leaving any residue. The maintenance and cleaning of the filter is no longer necessary and you save time and money.

Filter cleaning takes place automatically every 45 seconds. It is quieter than average and is therefore particularly user-friendly.

Patented HEPA 13 cartridge filter.

CraftiX advantages at a glance.

Whether you opt for an SPRiNTUS safety vacuum cleaner for dust class L or M, all four models have these innovative features.

Warning device and controls.

With the two CraftiX models of dust class M, the suction power is monitored by a warning device. After setting the smallest diameter used in the suction harness, the user is warned by an acoustic and visual signal if the required air flow is not reached. This avoids increased dust pollution of breathable air.

The power tool can be plugged directly into the vacuum cleaner thanks to the integrated socket. Due to the automatic switch on and off, the vacuum cleaner is started automatically or stopped with a lag of 5 seconds.

CRAFTIX 35 M + 50 M

- 1 Selector switch hose diameter.
- 2 High safety due to warning LED and acoustic warning signal.

CRAFTIX 35 M/L+ 50 M/L

- 3 On/off button automatic filter cleaning.
- 4 Standard operation with infinitely adjustable power regulation.
- 5 Automatic operation with connected power tool and infinitely variable power regulation.
- 6 Socket for power tools up to a maximum of 2.200 watts.
- 7 Customisation by way of printed logo.

Adapter plate for tool cases.

With only a single adapter plate from SPRiNTUS you can attach tool cases of all common manufacturers to the CraftiX (L-Boxx, Systainer, metaBOX, Tstak Box). The optional adapter plate can be mounted and locked on the suction head without tools and ensures safe transport of the tool boxes. Available from CW 14/22. Item no. 118.150

EM17EVO

New design. New smooth-running capability. Fully equipped.

Suggested Use

The EM 17 EVO is perfect for hard daily use with its robust planetary gear.
The 10-litre water tank ensures that work is performed quickly and comfortably. Due to the tool-free disc exchange, the EM 17 EVO can be adapted to all surfaces without long waiting times.
In combination with the Queen Bonnet Pad, unparalleled cleaning results can be achieved on carpeted floors. For optimal results in case of intense and tough dirt, the device weight can be increased with the optional 14 kg additional weight.

Due to the large rubberised wheels, the machine does not leave any marks, even on vulnerable surfaces.

Features

- Robust planetary gearbox
- Integrated 10-litre freshwater tank
- Tool-free change of brush and disc
- Changing of disks and brushes without the use of tools

HERCULES

Powerful, extremely robust and quietly running rotary disc machine.

Suggested Use

Intensive cleaning of all hard surfaces and carpeted surfaces.

The Hercules single disc machine is designed to offer an extremely silent running. It is a robust and easily operated single disc machine in the upper mid-range segment. With its large, user-friendly and ergonomic control, the machine can easily be steered and is perfectly suited for intensive, basic and preservation cleaning. The powerful and maintenance-free steel planetary gear with 175 rpm capacity always has sufficient reserves to rapidly and thoroughly clean all hard surfaces as well as to shampoo textile surfaces. With its high entire weight of 48 kg, and the two optional 14 kg additional weights, the machine's total weight can easily be increased to 76 kg at any time as required. Ideal conditions for thorough cleaning of stubborn stains and dirt. The Hercules offers you a durable, reliable and powerful all-rounder for flexible application on all surfaces with an outstanding price/performance ratio. The machine is equipped as standard with the full range of accessories, including a 12 litre fresh water tank, pad holder, as well as one shampooing and one scrubbing brush.

Features

- Maintenance-free steel planetary gear
- Integrated 12 litre freshwater tank
- Tool-free changing of brushes and discs
- Robust, ergonomic handlebar

ZEUS

The new ZEUS single disc floor cleaner is a masterpiece of ergonomics and innovation for the challenging, professional cleaning of hard surfaces and textile floor coverings.

Duo Pad.
Item no. 201.077

Power Pad.
Item no. 201.076

Uniquely, the 10 litres fresh water tank sits directly on the machine and therefore ensures an optimum contact pressure, easy handling and perfect cleaning results. The user can remove the tank in just a single action, and work efficiently beneath objects or in edge zones thanks to the low ground clearance of just 10 cm. The standard convenient plus point: The fresh water tank, equipped with a stretch hose, can be simply topped up with water directly at the tap. With its racy and powerful 1,500 Watt motor and the maintenance-free steel planetary gearing with 175 rpm, the ZEUS is extremely powerful and yet incredibly quiet. It is easy to operate and also enables inexperienced users to work safely, in an energy-efficient and fatigue-free manner. Added to this, it is simple to transport and space-saving when stored, because the shaft can simply be folded down fully. If necessary, the Zeus can be flexibly upgraded from a 54 kg net weight to a maximum 64 kg. Thanks to the special latching element, brushes and discs can be switched in seconds without tools. The new Zeus offers the maximum in quality, reliability and durability, and frequently proves to be a smart solution provider in everyday work.

EEM13 R

Orbital single disc machine.

TIP EEM 13 R Set with pump tank.
Item no. 202.005

Accessories:
Pump tank
Item no. 202.037

product video

Suggested Use

Bathrooms, baths, changing rooms, stairs, hard surfaces and carpeting.

The EEM 13 R orbital single disc machine is ideal for cleaning small surfaces, niches and corners due to its compact construction and simple operation.

With its nominal weight of 12.7 kg, it is also suited for use on staircases. The eccentric transmission ensures effective cleaning and problem-free, safe maneuvering without effort or strain. The large rubber-coated wheels allow for convenient transport without leaving traces on the freshly-cleaned surface.

You can clean hard surfaces, buff stone and parquet flooring, and even shampoo carpeting with the included accessories.

Features

- Powerful eccentric transmission
- Compact construction for easy handling
- Safe maneuvering without strain
- Complete accessories for all types of flooring

TITAN

High-performance orbital machine with excellent cleaning results and safe operation.

with 12 m
signal red power
cord

The orbital technology combines two types of motion to achieve a higher mechanical cleaning effect while reducing the use of chemistry and protecting the environment. The interplay of eccentric and rotating movements generates a special efficient cleaning pattern and thus differs from classic single-disc machines, which

perform a pure rotational movement. In terms of smooth running, the orbital method also has a very positive effect on handling and makes it possible to drive the machine in a safe and fatigue-free manner at all times. Even inexperienced users can quickly become familiar with the Titan and achieve excellent work results in the

shortest possible time. The areas of application in basic and maintenance cleaning, polishing, and scrubbing on all floor coverings (carpet, stone, PVC, wood, safety tiles) are almost limitless.

Advantages of the orbital machine in comparison to a single-disc machine.

- less water
- less chemicals
- less time
- less effort
- mounted cleaning area 100 % (see right)

Thanks to significantly higher mechanical cleaning effect!

Tilting drawbar for increasing the contact pressure.

Motor protection cover protects the motor from moisture.

Excellent stairway mobility and stability.

Optional additional weight, 12 kg.

TORANA

Battery powered 24 V floor scrubber dryer. Easy handling due to compact dimensions. Ideal for small and highly obstructed areas. Thanks to a brilliant aspiration system, places open to the public can also be cleaned during opening hours.

Battery operation: Battery life, 75 min. under normal operation, 120 min. in ECO mode. For small to medium-sized areas. Area efficiency, approx. 1,260 m²/h. Excellent aspiration system. The floor is fully dried and can be walked on right away.

Suitability
Ideal for office buildings, the retail sector, catering, hotels, schools, nursing homes, showrooms, hospitals and fitness centers.

Features

- Beltless direct drive
- Suction bar automatically turns into the direction of workflow
- Swinging suspended brush adapts to any surface
- Evenly high brush pressure - 15 kg
- Battery operation: Battery life, approx. 75 min. under normal operation, and 120 min in ECO mode
- Pleasant, quiet running allows cleaning even during opening hours
- Area efficiency, approx. 1,260 m²/h
- Standard charge level indicator and integrated charger
- Two maintenance-free 33 Ah gel batteries

The water quantity can be adjusted for any floor covering.

Long lasting ball-bearing wheels.

Practical fresh water indicator.

Hygienic and easy-to-clean waste water tank.

Comfortable brush ejection at the push of a button.

The machine can be easily transported via the support wheel.

Rubberised guard roller allows for cleaning that is damage-free and close to floor edges.

The manoeuvrability of the TORANA makes it possible to use it in the very smallest of spaces. Ideal for highly obstructed areas.

Removable, easy-to-clean 16-litre waste water tank.

Easy filling of the fresh water tank.

15-litre clean water tank.

Direct drive.

Swinging suspended brush, adapts automatically to any surface and compensates for slightly uneven surfaces.

Suction bar automatically turns into the direction of workflow.

Large, rubber wheels.

Clearly arranged operation panel.
All operating elements and switches are located on the panel and the ergonomically shaped handle. This ensures handy machine operation even in the smallest of spaces.

- ① The operating height of the control unit can be ergonomically adjusted.
- ② Lift/drain the suction bar.

Fresh water fill level indicator.

The maintenance-free gel batteries can be removed without tools via quick-connect couplings.

The clean water tank can be fully drained.

The dirty water tank can be emptied via the drain hose.

Easy filling of the 15-litre clean water tank.

Scrubbing brushes:
Brushes with different degrees of hardness are available for different surfaces.

Tipp
The horsehair brush is ideal for stoneware and safety tiles.

Optional:

Pad holders and pads with different degrees of hardness.

Duo Pad.

CAMIRA

Battery operated, 24 V scrubber dryer.
Easy handling due to compact size.

The CAMIRA is the latest product highlight of the SPRINTUS scrubber dryers. The machine, which is part of the 30-litre-class, convinces with a compact construction design and agility, which allows for extremely easy and efficient cleaning.

Equipped with two maintenance-free Sonnenschein gel-batteries with 50 Ah each, the running time is about 120 minutes and the machine cleans quickly and effectively medium-sized areas of up to 1600 m². At a low battery level, the connectible ECO mode can be activated and extends the running time of the machine when needed to conclude the cleaning task. The swiveling squeegee ensures an excellent suction power even during change of directions and the standard brush with a working width of 43 cm is perfect for a variety of cleaning tasks. The voluminous waste water tank, which can easily be cleaned due to its accessibility, is equipped with a user-friendly drain hose. The clean water tank can also be drained completely and makes the CAMIRA with its "brushdrop" at the push of a button, a standard on-board charger, and its excellent price-performance-ratio one of the most user-friendly machines in its class.

The standard eco-mode guarantees a longer battery runtime and greater coverage. To start the eco-mode, push the SMART RUN button for two seconds until the display starts to blink.

With the SMART RUN button, you can easily activate all functions. Brush rotation, suction and water supply.

User-friendly, ergonomic operating device with all functions clearly displayed.

Suction and water supply can be turned on and off individually.

On-/off button.

Battery runtime display.

Squeegee swivels automatically into the working direction.

Rubber castors ensure a safe cleaning performance along edges.

Standard waste water drain hose.

① Working height can be adjusted individually.

② Lift and release squeegee.

The extremely narrow construction design guarantees a perfect handling and unique maneuverability.

The CAMIRA is perfectly suited for medium sized areas of up to 1600 m².

Battery runtime of up to 120 minutes.

Clean water can be drained completely and comfortably with the fast closure system.

Water amounts can be adjusted individually to floor type.

Large, easy to clean waste water tank.

Internal charging station with battery runtime display.

Due to the support wheel, the machine can be transported easily.

SE 7

Spray-extraction cleaner with a separate anti-foaming tank.

Suggested Use

Designed for rug, carpet, and upholstery cleaning in offices, clinics, cinemas and households, as well as car upholstery.

With 4 bar spraying pressure and 230 mbar suction pressure, the SE 7 cleans quickly and thoroughly. The spray function can be turned on or off with the valve lever near the handle. The liquid levels of both the 6.5 litres fresh- and wastewater tanks can be checked at any time through the transparent lid of the device. Both tanks are separately removable.

A third, integrated container allows the use of anti-foaming agent.

The clear upholstery and floor nozzle allows free sight of the surface being cleaned and constant control over the process. Its ergonomic form guarantees effortless work.

The 7.5 m power cord ensures a large working range and can be rolled up on the cleaner handle after use. The body of the cleaner is made of impact-resistant plastic and is equipped with large, rubber-coated wheels, which leave no traces even on all sensitive surfaces.

Features

- Thorough cleaning through the 4 bar spray pressure and 230 mbar suction power
- Spray and extraction functions are separately operable
- Separate fresh- and wastewater tanks, each containing 6.5 L
- Separate container for anti-foaming agent
- Clear, ergonomic nozzles
- Long stainless steel vacuum tube for convenient, effortless work
- Rubber-coated castor wheels and large back wheels for streak-free work

Spray-and vacuum-function are separately switchable at the device.

A separate tank allows for the use of anti-foaming agent and guarantees problem-free work.

Functional principle:

Cleaning agent is sprayed on as needed.

Subsequent vacuuming up of the dirt, including liquid.

Clear upholstery nozzle for cleaning vehicle seats etc. The spray function can be adjusted via the operating lever on grip.

Large rubberwheels for silent running on tiles and mark free running on sensitive surfaces.

The floor spray nozzle with a long vacuum tube for convenient carpet cleaning.

TECHNICAL DATA	
Voltage	220-240 V / 50 Hz
Max. power	1100 W

PuriX

For hallway, bedroom and bathroom cleaning in public facilities, hotels, guesthouses, hospitals and nursing care. Colour-coded floor buckets, mounting for laundry or waste bags.

The PuriX in professional-graded quality consists in two robust plastic floor plates, the rear plate can be removed if necessary. The stable swivel casters and rubber-coated wheels are perfect for the requirements of daily, hard use. The lid on the laundry or waste bag can be conveniently operated from the ergonomic push handle. Mop or broom can be securely fixed in the built-in clip holder.

Integrated to the frame is a separate hanger for the warning sign. As standard, the PuriX is equipped with four buckets, a lateral moppdeposit, spacious 120 litres laundry / waste bag and a double bracket mop wringer.

TIP also a Medusa battery sweeper can be carried along on the cleaning trolley.

Warning sign holder, the warning sign can be stored directly on the service cart.

Very easy to take out laundry or waste by using the zipper.

Side shelf for e.g. Medusa.

Optional accessories:

Storage tray 3-chamber Set.
 Item no. 301.197

Storage tray 4-chamber Set.
 Item no. 301.198

Robust metal wringer.

Accessories: Optional waste separation.
 Item no. 301.119

TIP
 Standard in the complete set 301.133, and Starter set 013.032 & 013.033.

MatriX

Lockable cleaning trolley in two versions.

The MatriX, optionally with mop press or mop boxes, impresses with perfect workmanship, an extremely solid and robust construction, as well as an excellent price-performance ratio. The extra-large interior has three pull-out trays and a storage grid and offers versatile storage space for cleaning agents or other utensils. The lockable door ensures maximum security in the property and guarantees a modern and discreet appearance at all times. Thanks to the large rubberised 100 mm swivel castors, the MatriX can be moved effortlessly and safely at all times, even when fully loaded. The rear swivel castors have two individually lockable parking brakes and secure the MatriX against unintentional rolling away when parked.

Supply

Maximum load volume.
Extensive basic equipment.

4-colour coding throughout.

Lockable doors provide security.

Optional accessories:

Disinfectant dispenser for 500 ml. Item no. 301.289

6-litre bucket with transparent lid.

Disposal

Laundry or waste easily removed using a zipper.

120 litre capacity.

Optional waste separation.
Item no. 304.024

Practical support surface and storage for cleaning plans.

Optional waste bag small.
Item no. 304.025

Cleaning

Optional soaking aid.
Item no. 305.032 blue & 305.033 red

Hand free pick-up with optional V-Wing folding holder (p. 114).

Customisation

Design the door of your MatriX according to your ideas. As a travelling advertising medium, it transports your corporate design and your advertising message directly to the customer or visitor.

VariX

Expandable, lockable cleaning trolley in 3 versions.

With a total of three top-quality versions of the closed VariX cleaning trolley, we offer maximum benefits and the highest standards of hygiene for daily use in the healthcare and Ho-ReCa sectors. The modular design is more versatile than ever and enables the right solution for every application. With its smooth and easy-to-clean surfaces as well as closed hygiene casters, buckets and optional mop boxes, it can be used in compliance with the highest hygiene regulations.

The lockable doors ensure maximum safety in the building, and the large pull-out drawers offer tons of loading space. Even at full load, the VariX can be manoeuvred without any great effort, and the extra large 150 mm steering casters overcome obstacles easily.

The VariX series is a reliable partner with an excellent price-performance ratio and a high level of cost-effectiveness.

Magic Click

Ingeniously simple – simply ingenious! Foldable magnetic mop holder with patented self-standing function.

A smart solution with a big impact! Simply leave the Magic Click standing anywhere in the room when you need both hands free. The robust cardan joint can be pivoted all the way round for the figure 8 mopping technique and can be locked at any time so that the Magic Click can be left standing immediately and in any place. No need to lean it against the wall or an object. Goodbye to endless bending over to pick up the fallen mop. With Magic Click, you work effectively, quickly and consistently protect your back.

Magnetic-mop holder (VE 10 pieces)		Item no.
MAGIC CLICK	40 cm	301.039
MAGIC CLICK	50 cm	301.040
ACCESSORIES:		
Aluminium handle	1,40 m	301.018
Telescopic handle	0,80 - 1,45 m	301.037
Telescopic handle PRO	0,96 - 1,75 m	301.224
Spray handle		301.218

Ergonomic, ribbed grip for secure holding, even through gloves.

Accessories:
telescopic handle, height-adjustable in range 0.80 - 1.45 m for setting to the optimum working height. (Handle is not part of delivery content.)

Optional telescopic handle with Quick-action locking for simple height adjustment.

Strong magnetic catch with 5 kg closing force and automatic locking. The holder opens asymmetrically, thus facilitating threading into the mop pockets.

Shaft and holder are securely fixed with a stainless steel screw.

The click-action lock of the reliable self-standing function has been tested in a 10,000 action cycle.

All pivoting pins and screws are made of stainless steel.

The easy action rotary joint enables easy turning in any direction and at any angle.

The snap-action holder can be easily opened with the large 2-stage foot switch.

Click
Optionally in 40 or 50 cm working width.

Excellent production quality and an optimally balanced intrinsic weight guarantee perfect mopping action and strain-free working.

Magic Vario

The all-rounder with a “click”. Multi-functional for pocket and flap mops.

This multifunctional flat mop head with side flaps is unique in the world and is brimming with innovation and ergonomics. The Magic Vario saves you time and money thanks to its many practical details, and continues to look after your health.

Unlike any other folding head on the market, the Vario has a unique patented upright function allowing it to be set down anywhere in the room at any time without leaning it against the wall or other objects. Your staff will not have to move around so much on a daily basis, and also gain in

	Item no.
MAGIC VARIO 40 cm (10 pieces)	301.128
MAGIC VARIO 50 cm (10 pieces)	301.129
ACCESSORIES:	
Aluminium handle 1,40 m	301.018

Telescopic handle PRO 0,96 - 1,75 m	301.224
Spray handle	301.218

terms of safety by avoiding dangerous trip hazards and, as such, any resulting workplace hazards. This also does away with unnecessary streaks or marks on the wall, and bending down is reduced significantly. Excellent weight distribution makes the Vario extremely versatile, enables quick wiping even on areas with lots of furniture, and ensures a large area can be covered. Excellent workmanship and an optimum balanced weight guarantee perfect operation and effortless working.

- 1 Flexible**
The particularly smooth rotating joint enables easy pivoting in all directions and angles.
- 2 Simple**
The folding head is extremely easy to open with the 2-stage foot pedal.
- 3 Optionally** in 40 or 50 cm width.
- 4 Everyday help**
Thanks to the innovative spread of the isosceles shaped head, pocket mops can be stretched conveniently and in a vertical position.

You will find a selection of the various pocket mops on page 118-123.

- 5 All-rounder:**
The Magic Vario is suitable for all types of pocket and flap mops. Flap mops heads are always held securely in place by the flaps.
- 6 Comfortable:**
Press the cover out without touching it.

- 7 Optional:**
Telescopic handle with economic grip for secure purchase, even with gloves. Quick release for easy height adjustment. Item no. 301.037
- 8 Perfectly balanced:**
Extremely versatile and smooth folding head.
- 9 Ingenious:**
The Magic Vario can be set down anywhere in the room at any time. The patented upright function is tested to 10,000 ratchet operations.
- 10 Hygienic:**
When nearly completely closed, the Magic Vario is extremely easy to clean.

Our mop covers

for efficient cleaning.

Maximum quality.
We process only selected materials of the highest quality. In doing so, we focus on top performance with maximum durability and service life.

Four-colour coding.
Our mop covers have a four-colour coding (red, green, blue, yellow). To mark a cover, the flags that are not needed are simply cut off.

Tear-resistant, padded pocket material.
Thanks to the padded pocket material, the covers can be installed easily with the mop holder. The water can drain off perfectly through the durable and robust pocket material. The pocket material is manufactured according to our high requirements and undergoes regular testing procedures.

Embroidered care instructions.
On a label embroidered directly on the cover, important care instructions are inherently stable and permanently visible.

Your customer logo.
Increase your recognition value and have your mop covers individually printed with your logo, already upon the purchase of single box.

The right mop cover for your floor.

Different floor coverings and cleaning tasks require different mop covers. We offer you the right product solution for every floor covering and degree of soiling.

Increase your brand recognition with individualised products.

Video Mop printing

Mops with Logo print

If you purchase one box*, you can choose from a selection of microfiber and cotton covers. For a small surcharge, we can print them individually with your logo. In this special printing process, your company logo is integrated directly into the fibers and is scratch and wash resistant. The best: you receive your order within only a few working days.

Logo requirements for printing

- Maximum printing size: Width: 6,6 cm, Height: 3,4 cm
- Resolution of logo: Please send us an image file with your logo in high resolution. (Info: data format JPEG, PNG or TIF at least 300 dpi resolution)
- Content of logo: Please only send us your company logo and ensure that the file does not contain too small font types, symbols or images.
Tip: Print your logo file with a width of 6,6 cm and check if you can still read and recognise everything.
- Font size of logo: For a logo width of 6,6 cm, the font size of capital letters must be at least 2 mm and for lower case letters 1mm.

Custom order - custom made including embroidered labels.

If you can not find what you are looking for in our assortment, please contact us. We can look forward to a wide selection. We use materials that we coordinate and produce according to the particular application and their individual needs. In addition, we can offer on request any kind and special size, as well as color changes and coding, which correspond to your requirements and areas of application.
